

App concept scope

This application was designed with people who enjoy playing games in mind. The service is targeting players who use services such as Steam and is meant to help them have a more enjoyable experience when reviewing games and also helps them have a platform to express their thoughts.

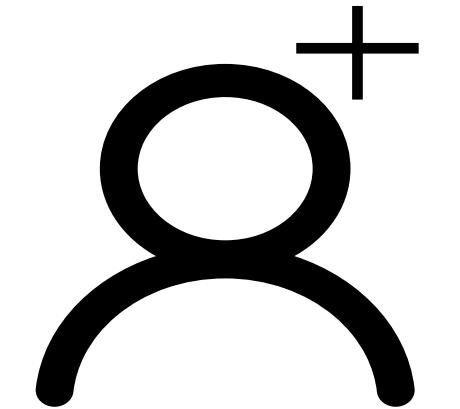

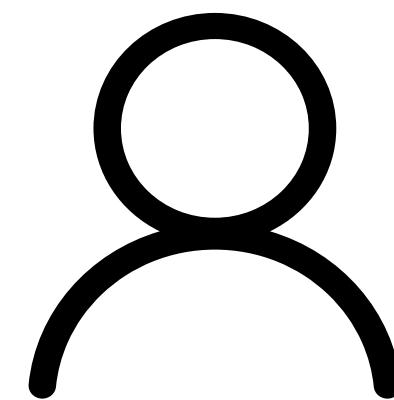

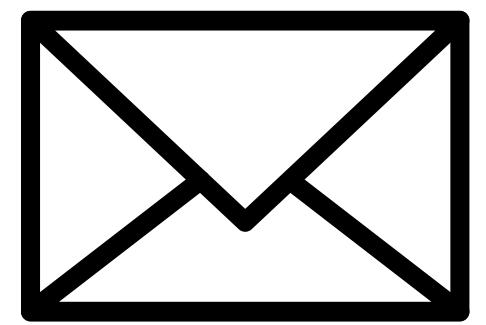

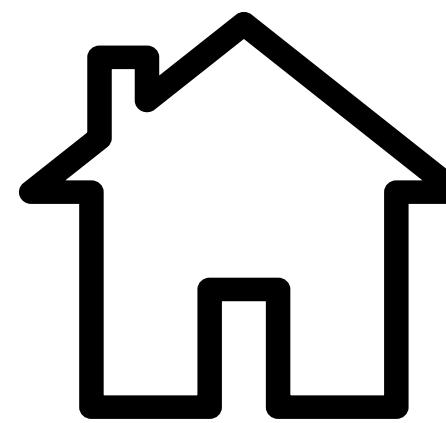

The application UI is meant to resemble most social media platforms that have a main feed with other amenities such as messaging compatibility and profile customization. I decided to go with a colorful and eye-catching color palette with a bit of grey mixed in which helps focus the eyes on the text boxes and the text written inside of them.

Lo-Fi Wireframes

This wireframe shows a post creation screen. At the top is a header bar with a user icon and a magnifying glass icon. Below it is a large input field with the placeholder "Write your thoughts....". A "Post" button is located at the bottom right of this field. Below the input field, there's a post card-like area. It starts with a user icon and the name "skeptic". To the right of the name is the text "170.5 Hrs on record". Below this, another text area says "such a fun and relaxing game". At the bottom left of this card is the text "Posted: October 5". At the very bottom is a navigation bar with icons for home, message, and profile.

Home Message Profile

This wireframe shows a user profile page. At the top is a header bar with a user icon and a magnifying glass icon. The main content area includes a circular profile picture, a "Username" field, and a "Biography" field. Below this is a "Custom Display" section. A prominent horizontal line separates this from a "Recent Activity" section, which displays "18 hours past 2 weeks" of activity. This section includes "total hours", "Game Title", and "Recent Achievements" fields. Another horizontal line separates this from a second "Game Title" and "Recent Achievements" section. At the bottom is a navigation bar with icons for home, message, and profile.
